

Strengthening Teacher and Leader Effectiveness 2 Program

Grantee Information:

Grantee: **Canisteo-Greenwood Central School District**

Abstract:

The STLE 2 grant will allow Canisteo-Greenwood CSD an opportunity to build a career ladder framework that supports research-based implementation of the CCLS on its way to establishing a high-performing district/culture. To address gaps in the TLE continuum, the Canisteo-Greenwood CSD STLE2 grant will focus on building teacher/leader capacity in data-driven instruction through targeted professional development and job-embedded skill coaching.

This will be accomplished by:

- K-12 active participation in professional development activities that build a common language and understanding of data-driven instruction and establishing a growth mindset
- Identification and training of ELA/Math Instructional Coaches to provide peer-to-peer support in the implementation of Common Core modules and data-driven instructional practices
- Identification and training of APPR Peer Reviewers to provide guidance to develop faculty capacity and continuity in their use and understanding of Marzano's self-assessment/iObservation
