

Strengthening Teacher and Leader Effectiveness 3 Program

Grantee Information:

Grantee: **Fort Plain Central School District**

Abstract:

The initiatives the district is funding are:

- A professional learning community for teachers and principals united for student success.
- Establishment of career ladders for teachers and building-level administrators, each with three rungs – an element of the TLE continuum that had previously been missing in the district.
- To utilize outside professional development experiences to support an instructional environment that relies on turnkey training.

Goal #1: Establish a professional learning community among Fort Plain teachers and school building leaders to improve teacher and school leader effectiveness in the district.

Goal #2: Increase student achievement through more effective teaching and school leadership practices throughout the district.

These initiatives will positively affect every student in the district; including students who are economically disadvantaged and who have disabilities (Fort Plain Central School District is a high needs district with a high percentage of students with disabilities).
