

Strengthening Teacher and Leader Effectiveness 3 Program

Grantee Information:

Grantee: **John W. Lavelle Preparatory Charter School**

Partner(s): **Wagner College**

Abstract:

John W. Lavelle Preparatory Charter School will develop the strongest teacher leaders from within the school to assume positions of mentorship, leadership, and administration. The initiatives proposed under this grant will deliver a quality leadership development and certification program, in partnership with Wagner College, for four highly effective teachers who have served on the leadership teams at Lavelle, supporting needed leadership development at the school and career ladder progression for the teachers.

The fieldwork associated with the licensure will include development and piloting an integrated performance management system and associated evaluation processes linked to the Danielson framework, as will be documented in the charter schools APPR plan. This fieldwork will include all members of the Lavelle leadership team and thus will impact all teachers by bringing a performance management approach aligned with professional development and evaluation processes to all members of the school community.
