

Strengthening Teacher and Leader Effectiveness 3 Program

Grantee Information:

Grantee: **Mayfield Central School District**

Abstract:

The STLE Grant will help establish career ladders for teachers and building administrators by selecting a highly effective or effective teacher to act as a full time Master Teacher to support our district's educators as they implement the Common Core Learning Standards and STEM initiatives. In addition, we will select from our highly effective and effective teaching staff to act as Teacher Leaders in the areas of ELA, Math, STEM, and Special Education to work closely with and help support the initiatives the Master Teacher is working on paying special attention to our newer teachers (less than 5 years) to ensure they are well supported. The result will be a professional learning community that works to implement best practice teaching techniques that are most relevant to the subjects they teach, bolstering curriculum to meet the demands of the Common Core standards through professional development, peer coaching, and collaboration. Administrators will also be given professional development in leadership and opportunities to expand their knowledge through higher education coursework and mentoring.
