Pre and post assessments are aligned to NYS Standards for each course. Classroom teachers assign individual differentiated targets for each student that is based on the student’s baseline performance. Students will either meet or not meet their individual target. The percentage of students that met their targets is calculated to determine teacher score. Using the two data points of the pre and post assessments, the number of students who met their targets is divided by the numbers of students participating in the assessments. Based on this calculation, a HEDI score is assigned to each teacher.
