The assessments being used for any Student Learning Objective are aligned to the appropriate content-area standards and NYS CCLS.

The Art, Music, FACS, PE assessments, as well as alternate assessments were locally-developed through collaboration of content-area experts and instructional specialists. The design of these assessments are modeled after NYS assessments in the corresponding content area if possible. Pre and post-assessments are administered in each course. Teachers of record are prohibited from scoring their own students' assessments. Content-area experts and instructional specialists score the assessments and submit the scores to the program administrators.

Please provide an overview of the student-level growth model or target setting model for SLOs for districts and BOCES, along with how student-level growth scores are aggregated to create teacher-level scores, and how those teacher-level scores are converted to New York State's 0-20 metric.

The classroom teacher will use relevant baseline data gathered through pre-assessments, as appropriate, or through the analysis of historical data provided by the home district to determine individual targets for each student. The percentage of students meeting their individual target will be determined and the percentage will be converted to a HEDI rating using the state-provided chart.
